New Product Announcement

256GB MyDigitalSSD Super Boot Drive SATA 2242 M.2 NGFF to ship as early as July/August

MyDigitalSSD is proud to announce the world's first 256GB SATA 2242 M.2 NGFF SSD!

As part of our Super Boot Drive series, this 256GB SSD delivers industry leading performance and reliability on top of its large storage capacity - making it the ideal upgrade for today's growing list of UltraBooks, Notebooks, ChromeBooks, Chromebox/NUC Mini PCs, and Desktop PCs.

This small form factor solid state drive, measuring only 22mm x 42mm, packs a punch with read speeds up to **540MB/sec** and write speeds up to **400MB/sec** (ATTO).

We feel this drive is a must have for anyone with a 42mm M.2 NGFF slot at their disposal. At 256GB, the MyDigitalSSD Super Boot Drive offers both casual and power users the ability to run an operating system, games, programs, and apps while still having room for pictures, movies, music, and other data - even more so when paired alongside an HDD.

Get more from your device, open new possibilities with a Super Boot Drive from MyDigitalSSD.

The 256GB Super Boot Drive SATA 2242 M.2 NGFF SSD has an anticipated release of late July to early August with a suggested retail price of \$179.99.

8GB, 16GB, 32GB, 64GB, and 128GB Super Boot Drive SSDs are now available for purchase at MyDigitalSSD retailers worldwide starting as low as \$24.99.
