## **New Products: MyDigitalSSD BPX Pro PCIe 3.1 x4 NVMe M.2 2280-S3-M Solid State Drives**

MyDigitalSSD is proud to introduce the latest addition to our X-Series of PCI Express® based solid state drives; MyDigitalSSD Bullet Proof eXpress (BPX) Pro PCIe 3.1 x4 NVMe M.2 2280-S3-M SSDs.

Powered by Phison's E12 (PS5012-E12) second generation flagship controller, BPX Pro SSDs push the limits of PCIe 3.1 data transfer with a four-lane interface that offers best-in-class sequential speeds up to 3.4GB/s (3,400MB/s) read and 3.1GB/s (3,100MB/s) write with blistering 4K random speeds for unprecedented system responsiveness, shorter boot times, faster application launches, and enhanced browsing.

MyDigitalSSD BPX Pro SSDs up the ante even further by packing up to 2TB of Toshiba BiCS3 TLC NAND flash on a compact 80mm (2280) M.2 drive with NVMe Express® 1.3 interface protocol that maximizes bandwidth while lowering latency and power consumption for improved performance at cooler idle temperatures of 25°C, compared to our first BPX series.

Additionally, BPX Pro SSDs safeguard your data using end-to-end data path protection, enhanced error correction, bad block management, and advanced wear leveling to ensure data integrity during high-speed transfers over an extended drive lifespan; making them an ideal upgrade solution for high-performance seeking gamers, DIY PC enthusiasts, overclockers, and graphics professionals alike.

MyDigitalSSD BPX Pro PCIe 3.1 x4 NVMe M.2 SSDs come over-provisioned in 240GB, 480GB, 960GB, and 1920GB storage capacities to guarantee sustained peak performance up to 3,115 TBW backed by a 5-year limited warranty.

Raise your performance expectations, experience a BPX Pro today.

Preorders are now available through Amazon and authorized retailers at the following introductory prices:

240GB \$99.99 | 480GB \$149.99 | 960GB \$279.99 | 1920GB \$599.99
