New Product: MyDigitalSSD M2X+ USB 3.1 Gen 2 Combo PCIe NVMe / SATA M.2 SSD Adapter Enclosure

MyDigitalSSD is pleased to announce the M2X+ USB 3.1 Gen 2 combo PCIe NVMe / SATA M.2 SSD adapter enclosure with added solid state drive compatibility and lower power consumption.

The follow-up to our best-selling NVMe-only M2X, the M2X+ allows users to transform any PCIe NVMe (M-Key) or SATA (B+M-Key) M.2 (2280 / 2260 / 2242 / 2230) SSD into an ultra-fast, ultra-portable pocket drive.

The M2X+ uses the Realtek RTL9210B chipset, the lowest power-consuming USB 3.1 Gen 2 to PCIe 3.0 bridge solution on the market, to double USB 3.1 Gen 1 data transfer speeds up to 10Gb/s with minimal power consumption for extended use and efficiency.

Its durable yet lightweight enclosure design protects your data inside and out with crush-resistant aluminum housing and a grooved heatsink base that safeguards your data against accidental shock or vibration while helping to prevent overheating and thermal throttling at home or on the go.

The M2X+ is fully bus-powered and comes with two 9-inch cables for USB Type-C (USB-C) or USB Type-A (USB-A) plug-and-play connectivity, offering near-instant data access anywhere anytime, no additional drivers or software required.

Additionally, the M2X+ is backwards compatible with USB 3.0 and USB 2.0 ports at their respective maximum transfer rates and supports TRIM, 4Kn, UASP, and BOT protocols to maximize drive performance.

MyDigitalSSD M2X+ USB 3.1 Gen 2 combo PCIe NVMe / SATA M.2 SSD adapter enclosures are available now at MyDigitalDiscount.com and Amazon.com for \$22.99, backed by a 1-year limited warranty.
