New Products: MyDigitalSSD Pocket Vault eXpress Series Thunderbolt™ 3 Solid State Drives

MyDigitalSSD is pleased to announce the Pocket Vault eXpress (PVX) series of ultra-portable Thunderbolt™ 3 solid state drives.

The latest addition to MyDigitalSSD's X-Series of PCIe-based solid state drives, the PVX are pocketable external SSDs that combine Gen 3 M.2 PCIe technology with the Thunderbolt 3 interface for variety of uses including, instant-access media storage, acting as a high-performance shuttle drive, serving as an ultra-fast portable scratch drive for editing raw 4K video at higher frame rates, or performing IT duties like installing applications and operating systems.

PVX SSDs feature the Phison E8 (PS5008-E8) controller and Toshiba 3D TLC NAND flash to deliver real PCI Express SSD performance with max sequential speeds of 1.55GB/s (1550MB/s) read and 1GB/s (1000MB/s) write, enough to transfer a 4K movie in under 30 seconds.

Thunderbolt 3 brings Thunderbolt to USB-C at speeds up to 40 Gbps, creating one compact port that does it all - delivering the fastest, most versatile connection to any dock, display, or data device.

The PVX chassis design provides a sleek and professional look at home or on-the-go with a slim but solid aluminum exterior that includes two rubber grip pads to prevent sliding on flat surfaces. MyDigitalSSD PVX drives are also fully bus-powered for complete portability, no power adapter needed, and connects directly to any computer with a Thunderbolt 3 port, or at the end of a Thunderbolt 3 device daisy chain, via a captive 0.5-meter Thunderbolt 3 (40Gbps) cable.

MyDigitalSSD PVX SSDs include a 5-year limited warranty and will be released in 4 storage capacities, 128GB, 256GB, 512GB, and 1TB (1024GB) to Amazon, Newegg, and MyDigitalSSD retailers in early 2018.
